

## PATIENT CONSENT TO RECORD SHARING

Your health record with your GP practice is held securely on their electronic system.

In order for us to treat you at the GP Hub, our doctors and nurses need to be able to have access to your full health record.

When you book an appointment with the GP Hub through your practice, you will be asked to consent to allow the doctor/nurse at the GP Hub to view your health records, in the same way as the doctors and nurses at your own practice.

**If we do not have your consent to view your health records, we will not be able to see you in the GP**
